

Hey Everyone,

You'll get a longer investor update sometime over the weekend but I just wanted to follow up and let everyone know that the first vest for \$gob occurs on Monday. They will happen weekly on Monday evenings going forward and be claimable at [Gob.WTF](#).

I have the proper information for a lot of you that filled out the google form but not everyone. I will be following up with every single person here from now until Monday to try to make sure everyone is set. It's a weekly slow drip over 30 months so don't stress if you aren't set on Monday.

A quick note:

Some have asked if Truth Arts can hold back their token until the end of the vesting, which is something we can do. Others have asked for that and for us to swap to USDC at the end and just send that so they don't have to have any wallet security risk, which we are also happy to do.

If you didn't put your info into the Google form feel free to add it now ([here](#)). Either way expect an email from free to either confirm the info you gave or help you get me what we need.

Thanks!

Alex
